GAMMA SPECTROSCOPY AR

HPGe vs NaI(Tl): from gamma photon to energy spectrum

KACST
مدينة الملك عبدالعزيز للعلوم والتقنية

Developed by Dr. Alhussain Abuhoza

1 Scan to open

Android (Chrome): choose "AR on a table".
iPhone or Android: choose "AR with the printed marker".
Any device: "3D view".
`https://alhussainali.github.io/gm-counter-ar/gamma/`

2 For marker mode, point the camera at this marker

Lay the sheet flat in good light. Keep the whole black square in view.

- Print at 100% (no "fit to page") so the marker stays square.
- One finger rotates the bench, two fingers resize it. Animations are slowed ~10^9 times; real radiation is invisible.
- Educational simulation: all sources, rates and spectra are simulated. No radioactive material is involved.
